

1<sup>st</sup> Recipient of the DOE sponsored Lighting Facts Label  
for Under-Cabinet Lighting Announced

Radionic Hi-Tech, Inc of Chicago, IL is pleased to announce that they are the first (and only, as of 4/24/09) manufacturer of under-cabinet LED lighting fixtures to receive the Lighting Facts label. Sponsored by the U.S. Department of Energy and endorsed by major retailers including The Home Depot and W.W. Grainger, the Solid-State Lighting Quality Advocates label was “created to assure and improve the quality of LED lighting products” ([www.lightingfacts.com](http://www.lightingfacts.com)).

Similar to the label one might find on the back of a food carton, Radionic will include a “Lighting Facts” label (see below) on its LED products so that consumers can more easily understand the solid state lighting products available as they comparison shop. Radionic CEO Jeffrey Winton explains, “We are pleased to be doing our part in communicating *honest* information to American consumers about LED products and hope additional manufactures will join us in our commitment to making the transition towards more sustainable forms of lighting, easy and affordable for average Americans.”

Winton continues, “While LED’s are no longer a new invention, the lighting industry has yet to release an *affordable, high quality* under-cabinet LED fixture.” The first Radionic products to undergo the independent lab tests required to receive the Lighting Facts label included its ZX Series in warm white. Innovatively designed and specially priced to meet the average American consumer’s needs, the ZX Series is engineered to emit comparable light to a typical fluorescent under-cabinet fixture, but will use approximately ½ the energy. The ZX513 and ZX515 currently have patents pending at the U.S. Patent and Trademark Office.

Radionic Hi-Tech, Inc. designs, engineers and manufactures lighting fixtures for many of the industry’s leading OEM’s in North America. Founded in 1939, Radionic manufactures a full line of lighting fixtures and fluorescent lamp ballasts and has enjoyed a strong quality and service reputation for nearly 70 years.

The ZX Series is in stock and available for purchase at [www.factorydirectlighting.net](http://www.factorydirectlighting.net). For more information call/email: (773) 804-0100, [sales@radionic.net](mailto:sales@radionic.net). More information about the Lighting Facts label, including a list of partners, can be found at [www.lightingfacts.com](http://www.lightingfacts.com).

*Radionic is proud to display the first Lighting Facts labels for under-cabinet lighting:*
